

# chan.02

## The transformable hanging lamp

*«chan.02» is a flexible and adaptable LED lamp that makes your interior a poetry of light. With «chan.02» you can fully brighten your living space or play with the different shades of dim and bright light. You design your own light effects according to your needs and personal taste.*

*> more details [sapperlot.ch](http://sapperlot.ch)*

*Stylish interiors need matching lights.*

*«chan.02» is a poetic light object which complements interior design at its best. Due to the variability of the lampshade, can according to the selected folding, more or less light pass into the room.*

### concept

*«chan.02» comes with a compact construction set and can easily be built together. Depending on how the lampshade is folded, different light variations occur.*

*The name «chan.02» is inspired by the fashion label Chanel and its black and white dress collections. Number .02 means that it is the No. 2 of the chan - lighting collection.*

*The „chan.02» LED-lamp is available in sizes S, M and L.*

*The lampshade is made of a tear-resistant nylon fabric and can be shaped in various forms. Depending on the folding, air is transported and dissipated in the lampshade. The fabric is impermeable to air and stabilized by the folding structure. The black and white textile surfaces define the amount of light that illuminates the room. The black areas concentrate the amount of light and the white spread it in the room.*

*In the design planning phase of chan. collection the bionic approach played a significant role. Observing grasses as well as the opening of flowers and the effect of in- and outflow of air gave important impetuses for the composition of the object.*

*«chan.02» is based on the concept of sustainable design. Its folding mechanism does not require much material and the LED technology allows to use energy economically. The luminaire is easy to transport as its parts can be folded.*

*assembly*

*1 Insert the rods within the layers of fabric in the angle bars.*

*2 Attach the lampshade on the terminals.*

*3 the clamping ring screw on the lamp holder.*

*4 The LED bulbs screw.*

*fold*

*lampshade - variation*
